TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C

Web Development: Spring Boot, Node.js, Express.js, React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Databases: MySQL, MongoDB

Tools & Platforms: Git, Linux, LangChain, Docker, AWS

EXPERIENCE

Haskel AI

Feb 2025 – Present

Frontend Developer Intern

Remote

- Led frontend development for key LMS modules by designing reusable, scalable React components and implementing efficient state management for dynamic content rendering.
- Architected API integration workflows by consuming RESTful services, handling asynchronous data flows and improving error handling for reliable user interactions.
- Optimized application performance by reducing unnecessary re-renders, improving component structure and collaborating with backend engineers to enhance API response efficiency.

PROJECTS

Shop Assistant Bot | LangChain-Powered Inventory Assistant

Jan 2026

AI Engineer

- Built a real-world AI-powered inventory backend using FastAPI, MongoDB and LangChain to manage stock, sales data and product queries through natural language input.
- Integrated Groq LLM strictly for query understanding and response generation without direct database access.
- Developed REST APIs and connected a React-based interface for interactive inventory management.

Thinker | Serverless Notes Management Application

Sep 2025

Cloud Backend Developer

- Built a fully serverless backend using AWS Lambda, API Gateway and DynamoDB to deliver a scalable and high-availability REST API.
- Implemented CRUD operations with IAM role-based access control to ensure secure API access.
- Configured CloudWatch logging for real-time monitoring and operational visibility.

Cityzen | Citizen Management Portal

Jul 2025

Full Stack Developer

- Designed and developed a microservices-based architecture using Spring Boot with secure JWT authentication and role-based access control.
- Built responsive and dynamic frontend interfaces using React.js for document management, service booking and volunteer coordination modules.
- Integrated MongoDB and MySQL for structured data persistence and containerized services using Docker.

EDUCATION

Karpagam College of Engineering

2022 – 2026

B.Tech in Information Technology

CGPA: 7.6

S D Eaden Matric Higher Secondary School

2022

Higher Secondary Certificate (HSC)

85%

S D Eaden Matric Higher Secondary School

2020

Secondary School Leaving Certificate (SSLC)

91%

CERTIFICATIONS

- AWS Cloud Practitioner Essentials (AWS)
- Developing Back-End Apps with Node.js and Express IBM (Coursera)
- Advanced React Meta (Coursera)
- React Meta (Coursera)
- Introduction to MongoDB (MongoDB)
